

Service

Full Load Output for the Future

Our Service: Reliability and Safety in the Long Term

You can expect highest quality and safety from our gearboxes – for this the name Jahnle-Kestermann Getriebewerke GmbH has been standing for decades in development and production. Still, we will not leave you on your own after the gearbox starts running, since only if your construction runs trouble free, it is also profitable on the economic aspect.

Our service offers you inspections and repair works in our shop or at site.

Production and service belong to our most important future-oriented basic principles. With principles like this we meet the requirements of the market and are able to comply with the growing needs of our customers to offer complete drive technologies, so to speak, as a “power pack from a single source”.

According to the technical possibilities which the latest component technology offers we offer you also the possibility of an upgrade alternatively to repair works.

Due to higher safeties you do not only benefit from a higher durability but also a quality that meets higher requirements for your gearbox.

Our Goods and Services:

Documented damage analysis
Deliveries of spare parts
Exchange gearboxes
Gearbox repairs

Gearbox modifications / Upgrade
Gearbox service worldwide
New gearboxes – for own and foreign products
Original manufacturer warranty

Ja)(Ke analyses the condition of your plant and provides remedy on site in many cases. Thereby the down time is minimal. You will receive a detailed service report.

We offer you the whole business activities of an innovative manufacturer of new gearboxes, from the design modifications over the exclusive usage of original manufacturer quality parts up to the test run under load. This is also valid for gearboxes being not delivered from Ja)(Ke. Here, our strength is exceptionally in the range of new gearboxes, exchange gearboxes, repairs and upgrade gearboxes.

Ja)(Ke's Advantages:

Mobile measurement technology
 Technical amendments/Upgrade
 Original manufacturer parts
 Own production of parts

Gear cutting, grinding, tothing measurement
 Production of exchange gearboxes
 Test capacity up to 3 megawatt
 Short delivery periods

High-Class Standards

Jahnel-Kestermann Getriebewerke GmbH as a manufacturer only delivers certified gearboxes. With the same demanding measures we offer only certified spare parts. All our customers benefit from the Jahnel-Kestermann copyright.

The quality for the certified gearbox is ensured from the technical design to the own specified material specification, which exceeds standard specifications as well as the own production of components.
